

What is Glass Wash?

GLASS WASH is a premium detergent and industrial strength cleaner for use in glass-washing machines. It will remove residues and soilage from glassware with no spots or streaks.

Key Benefits

- ✓ Leaves glasses sparkling clean
- ✓ No spots or streaks
- ✓ Industrial strength
- ✓ Suitable for hard water areas

How Does It Work?

GLASS WASH is an industrial strength cleaner that removes beer and wine residues, fatty finger marks, lipstick imprints and all other soilage from glassware, leaving them sparkling clean with no spots or streaks. GLASS WASH may be used with hard water without detracting from its performance.

For Use On...

GLASS WASH is a premium detergent for use in glass-washing machines. This product satisfies the requirements of Breweries for products used to clean beer glasses in Glass Washing machines.

Technical Data

Properties

COLOUR – Clear, colourless liquid
 ODOUR – None
 pH = 10.6 – 11.6

Environmental Care

GLASS WASH conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. GLASS WASH is non-flammable and contains biodegradable surfactants. GLASS WASH containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

GLASS WASH produces excellent results when used at a dilution rate of 15ml per litre of water in the wash cycle. The dilution will remove the heaviest soilage from glassware. Lower rates, to 3ml per litre, may be used when the glassware is lightly soiled and the water supply is soft. Different makes of Glass Washing machine and the correct dilution rates are shown below:

MACHINE	MODEL	GLASS WASH MIXTURE
<i>Aquamatic</i>		1 in 5
<i>Dishlex</i>	Various	Use undiluted
<i>Waldorf</i>	Various	Use undiluted
<i>Eswood</i>	CI, CI Deluxe, IW, IW Deluxe	1 in 4 then add to tank on machine
<i>Eswood</i>	CI3B, IW3, B42G	1 in 4
<i>Johnston</i>	Junior Universal Glassmaster	1 in 4 then add to tank on machine
<i>Red-e-Clean</i>		1 in 4 then add to tank on machine
<i>Norris</i>	B, D, E, E17, G, F, BT160	1 in 10

Results are also affected by the glass washer design and Factory settings for detergent volume. Consult the manufacturer of the machine if good results cannot be achieved.

Health Acts: The use of HOT WATER with detergent for washing glasses may be stipulated by State Health Regulations.

Disposal Information

1. Used solutions -

Used Solutions of GLASS WASH should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. GLASS WASH containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
