

## What is Taurus?

TAURUS is a high-quality, environmentally responsible laundry liquid for industrial and domestic clothes-washing. It is safe for washing all cottons, coloureds, whites, synthetics, blends and machine-washable woollens.

### Key Benefits

- ✓ Concentrated detergent
- ✓ Use in hot or cold water
- ✓ Whitens and brightens fabric
- ✓ Fresh fragrance

## How Does It Work?

TAURUS is a high-quality environmentally friendly laundry liquid for industrial and domestic clothes-washing. TAURUS is safe for washing all cottons, coloureds, whites, synthetics and blends. It works in both hot and cold water. TAURUS may also be used to wash machine-washable woollen garments.

## For Use On...

TAURUS is a detergent for industrial and domestic laundering of clothes, and can be used to wash cottons, coloureds, whites, synthetics and blends in laundry washing machines. It is suitable for both top-loaders and front-loaders.

## Technical Data

### Composition

TAURUS contains a blend of surfactants and builders together with whitening and brightening agents. TAURUS also contains agents for softening hard water and a fresh fragrance.

### Properties

COLOUR – Blue liquid  
ODOUR – Premium floral perfume  
pH = 9.5 – 10.5  
FOAM – Low to moderate foaming

## Environmental Care

TAURUS conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. TAURUS is non-flammable, biodegradable and phosphate-free. TAURUS containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

## Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

## Application

Machine	Light Load	Medium Load	Full Load
Twin-tub	1/4 cup	3/4 cup	1 cup
Top Loader	3/4 cup	1 cup	1 1/2 cup
Front Loader	1/2 cup	3/4 cup	1 cup

Add an extra 1/4 to 1/2 cup in hard water regions

1 cup = 250ml

Industrial: 1L per 100kg of dry washing

### Stubborn Stains:

- First remove as much soilage as possible and rinse with water. Then pour a little TAURUS directly onto the stained area and place the garment in the wash *immediately*.

### Water Temperature:

- Use COLD water for bleeding colours, pleated garments, blood, protein or chocolate stains.
- Use WARM water for nylons, polyesters, acrylics, permanent press and colourfast colours.
- Use HOT water for cottons (whites and pastels), heavily soiled or oily clothes.
- Dissolve the TAURUS in the water before adding clothes to the machine.
- Separate whites from colours and wash separately.
- Always test new items for colourfastness: dip a corner of the garment in a solution of TAURUS in hot water then squeeze. If the colour runs out, it is not colourfast, and this garment should not be washed in TAURUS.
- Follow the clothing maker's instructions for laundering woollens.
- Turn delicate garments inside out.
- Do not dry coloured garments in full sun.
- After adding TAURUS to the wash, rinse hands with clean water to avoid skin contact with the liquid. People with sensitive or damaged skin should wear gloves.

## Disposal Information

### 1. Used solutions -

Used Solutions of TAURUS should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

### 2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

### 3. Empty packaging

#### Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. TAURUS containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

#### Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
